from

Johnson screens®

PVC Shur-Align Drop Pipe, PVC Male x Male Coupled Pipe

The Shur-Align drop pipe's patented design allows for quick and safe installation for any submersible pump. The patented Shur-Align joint is an innovative and simplistic PVC pipe design: it features a simple alignment and engagement, a beveled shoulder, quick makeup and watertight seal.

In addition to the Shur-Align drop pipe family of products, Johnson Screens also offers a male x male coupled drop pipe. Available in either S80 or 120 pipe, with sizes ranging from 1in. / 25mm to 8in. / 76mm. They also offer stainless steel couplings to join the male ends together.
